

**American Society of Sanitary Engineering
Seal (Certification) Program**

**Factory Audit Inspection Test for:
Hot Water Dispensers, Household Storage Type, Electrical**

**Tested under ASSE Standard 1023 • Issued: 1973
Factory Audit Inspection Test**

Manufacturer _____

Model No. _____

Address _____

Serial No. _____

Other Identification Markings _____

Size _____

Connections (screwed, flanged, etc.) _____

2.2 Maximum allowable water temperature.

What was the maximum water temperature produced by the unit adjusted as received for test?
_____°F (_____°C)

2.3 Leakage and Drillage

(a) What was the cold supply water temperature? _____°F (_____°C)

(b) During the test what was the Voltage? _____ Amps? _____

(c) Was there any drippage observed during the heating of the tank from a cold start?
 Yes No Questionable

If questionable, explain: _____

(d) Did the drippage stop when the thermostat opened? Yes No Questionable

If questionable, explain: _____

(e) Was any drippage from the nozzle observed during the two heating cycles called for after the original heating from a cold start? Yes No Questionable

If questionable, explain: _____

(f) Was any drippage from the nozzle observed during any of the ten (10) dispensing cycles of 6 oz. each? Yes No Questionable

If questionable, explain: _____

TESTING AGENCY _____

ADDRESS _____

PHONE: _____ FAX: _____

TEST ENGINEER(S) _____

We certify that the evaluations are based on our best judgments and that the test data recorded is an accurate record of the performance of the device on test.

Signature of the official of the agency: _____

Title of the official: _____ Date: _____

Signature and seal of the Registered Professional Engineer
supervising the laboratory evaluation:
