ASSE 15010 ITM FIRE PROTECTION CERTIFICATION

PROCESS:

- 80-hour training course covering ASSE 15010 (*Inspection, Testing and Maintenance (ITM) of Water-Based Fire Protection Systems*)
- 200-question written exam encompassing all aspects of ASSE 15010 (must receive a score of 75%)
- Practical exam covering course material and multiple system tests
- Recertification every 3 years, including an 8-hour course, written exam, and practical exam.

PREREQUISITE:

- 21+ years of age
- 100 hours of documented training related to water-based fire protection ITM
- Completed a 5-year state or federally approved fire sprinkler apprenticeship program; OR 5 years of acceptable documented practical experience in the water-based fire sprinkler industry with at least 3 of those years consisting of ITM.

Use your knowledge and skills to inspect, test, and maintain water-based fire protection systems beyond the minimum requirements of NFPA 25.

Although there are other organizations that certify individuals as being competent in the inspection and testing aspects of NFPA 25, ASSE International developed the ASSE 15010 certification program to raise the bar for fire protection industry personnel and ensure public safety.

A person certified to ASSE 15010 has the qualifications to perform evaluations of fire protection systems for conformance to codes and standards, and determine if sprinkler systems are adequate based on building evaluations and uses, in consultation with a licensed engineer in some states, which is beyond the scope NFPA 25.
