Griff Gherke
Brian Mazzocchi

“THE ILLINOIS CHAPTER OF THE AMERICAN SOCIETY OF SANITARY ENGINEERING THANK OUR BROTHERS AND SISTERS, AT THE INTERNATIONAL ASSOCIATION OF PLUMBING AND MECHANICAL OFFICIALS FOR THEIR DEDICATION TO THE HEALTH AND SAFETY OF THE PEOPLE OF THE WORLD.”

“WORKING WELL WITH OTHERS”

Published by: Joseph W. Sowa Sr.

President’s Thoughts:

Hopefully, everyone has had the opportunity to enjoy their favorite summer activities, but please make sure to drink enough fluids, especially water, to stay hydrated and to eat light snacks if you have been physically active. I hope everyone and their families have been able to remain safe and healthy on the weather roller coaster that we have been riding on. Joe

Some Codes that an Architect, Contractor, Engineer, Plumber, or Plumbing Inspector, who are employed in the State of Illinois, should be familiar with:

ASSE Illinois Chapter wishes to thank all our sponsors for advertising in the monthly newsletter, which is sent to all the International Chapters of IAPMO/ASSE. We appreciate each and every one of you.

INTELLIGENT OIL DETECTION

The IntelliOil, an intelligent oil-sensing control system, is designed to help protect the environment and equipment from the dispersion of oil and hydrocarbons in elevator pit applications. Our complete system solutions for elevator pits and vaults include packaged pump systems. We can customize a complete package that is tailor-made to meet the unique specifications of each project.

- 1. STATUS INDICATORS**
Lights indicate the system status and will continue to light even if the alarm is silenced.
- 2. AUDIBLE ALARM**
Sounds the alarm to issues, such as the presence of oil in the pit and high water levels.
- 3. OIL SENSING PROBES**
If probes lose contact with water (oil presence), the system turns off the pump to ensure no oil gets pumped out, and an audible alarm will sound to notify the presence of oil in the pit.
- 4. FLOAT SWITCH**
As the water level rises and falls, the float switch will trigger the run of the pump.

Typical Installation Diagram

Metropolitan Industries, Inc.
(815) 886-9200 • METROPOLITANIND.COM

Additional Information:

- 3 different models
 - 120V, 15A | 120V, 20A | 208/240V, 15A
- System status indicators and audible alarm
- Dry contact alerts for power loss, oil in pit and high water level
- Built in HOA selector and alarm silence button
- Combination oil probe/off float simplifies installation
- Can be integrated into three prepackaged models

Can be custom designed for specific applications by utilizing the IntelliOil's circuitry

WALL UNITS

Designed to be our commercial "workhorses," our wall hung units are ideal for highly variable applications using potable hot water. Each is engineered with minimal components to maximize durability.

DROP IN READY

When space and cost are important deciding factors, you can count on our Neuron Series units for superior performance and reliability. Ideal for commercial applications, our tankless water heaters provide 94% thermal efficiency and are constructed for maximum durability.

FLOOR-STANDING UNITS

Our iQ Series floor-standing units deliver the highest capacity in the industry – up to 3 million BTUs – with no storage tanks required. Designed for very large volume, commercial applications, these highinput units slash capital costs by up to 50%, and decrease operational costs by up to 40%, when compared to traditional tank-type systems.

DIGITAL SOLUTIONS FOR HEALTHY HOT WATER.

- Simplifies your hot water system by eliminating the need for compensating system components required with a mechanical thermostatic mixing valve
- Delivers temperature control within 2 degrees
- Communicates temperature alerts to most building automation systems
- An essential component to a successful water management program

Viega system solutions.

Multiple materials, many solutions
One provider

Meeting and exceeding industry standards with every installation

With these advanced engineering elements, Viega systems can be used in gas, compressed air, potable water, fire-resistant fluids, or hydraulic applications. Viega's proven technology is available in multiple materials, and connections can be made in less than several seconds, saving up to 80% on installation. Find peace of mind on the job with Viega products that include the Smart Connect™ feature, allowing installers to easily identify unpressed connections during pressure testing.

BACKFLOW REPAIR COURSE \$85

This course is focused on refreshing the Cross Connection Tester on testing procedures as well as hands on repairs for approved assemblies for the state of Illinois. During this class we will be going over our NEW mechanical wall, show you how water pressure fluctuations affect backflow assemblies, how to remedy the situation and be able to see it in a live setting. Also new this year is the Flood Control Integrated System by Wilkins; this system can be designed to shut off a specific water line when a backflow goes into a full dump situation.

ARMSTRONG NANOBUBBLE GENERATOR A Critical Component of a Healthy Hot Water System.

A proven solution for the inhibition and removal of scale in hot water systems.

Beneficial outcomes of the Armstrong Nanobubble Generator:

- Improved heat transfer (equipment operates more efficiently)
- Reduced equipment maintenance costs
- Extended equipment life resulting in lower capital expenditure
- Reduced CIP frequency and associated labor costs
