

HELP PROTECT OUR WATER

with

ASSE 5000 CROSS-CONNECTION CONTROL CERTIFICATION

ASSE certification in the specialized skills of backflow prevention assembly testing, repairing, and surveying adds nationally recognized credentials to your resume, enhances your skills, and increases the number of tasks you can perform – ultimately raising your employability.

ASSE Certifications
for a **Stronger Workforce**

Expand your professional capabilities while protecting our nation's potable water supply with ASSE 5000 Cross-Connection Control Certification.

Jurisdictions and employers feel confident knowing that ASSE certified professionals have completed a qualified course of instruction, passed a written exam, and passed a practical exam covering the knowledge and skills needed to protect water supplies from backflow or cross-contamination.

There are more than 20,000 ASSE Certified backflow professionals spanning all 50 states in the U.S. and parts of Canada. Join these qualified individuals and expand your skill set by becoming certified at one of the 100-plus ASSE approved schools around the country.

To learn more and find approved schools, scan the QR code above.
