About IAPMO Group Indonesia

- **Established on May 17, 2016**

- **Located in Cikarang, www.iapmoindonesia.org Bekasi**

About Us

PT IAPMO Group Indonesia (IGI) is a complete service conformity assessment body and a subsidiary of the IAPMO Group with headquarter office in Ontario, California - USA.

IGI was established in 2016 to support the Indonesian government in the development of plumbing system standard and related conformity assessment activities. Since its inception, IGI has extended its commitment to the Indonesian government beyond plumbing to include supports for construction, building, mechanical, hygiene and sanitation, food equipment, and many more areas for standardization and conformity assessment. IGI also supports the advancement of green and sustainability measures in Indonesia.

IGI's head office and laboratory facility is located in Cikarang, Indonesia's largest industrial area, and is ready to serve industrial stakeholders to enter both the Indonesian market and international market.

OUR GOAL

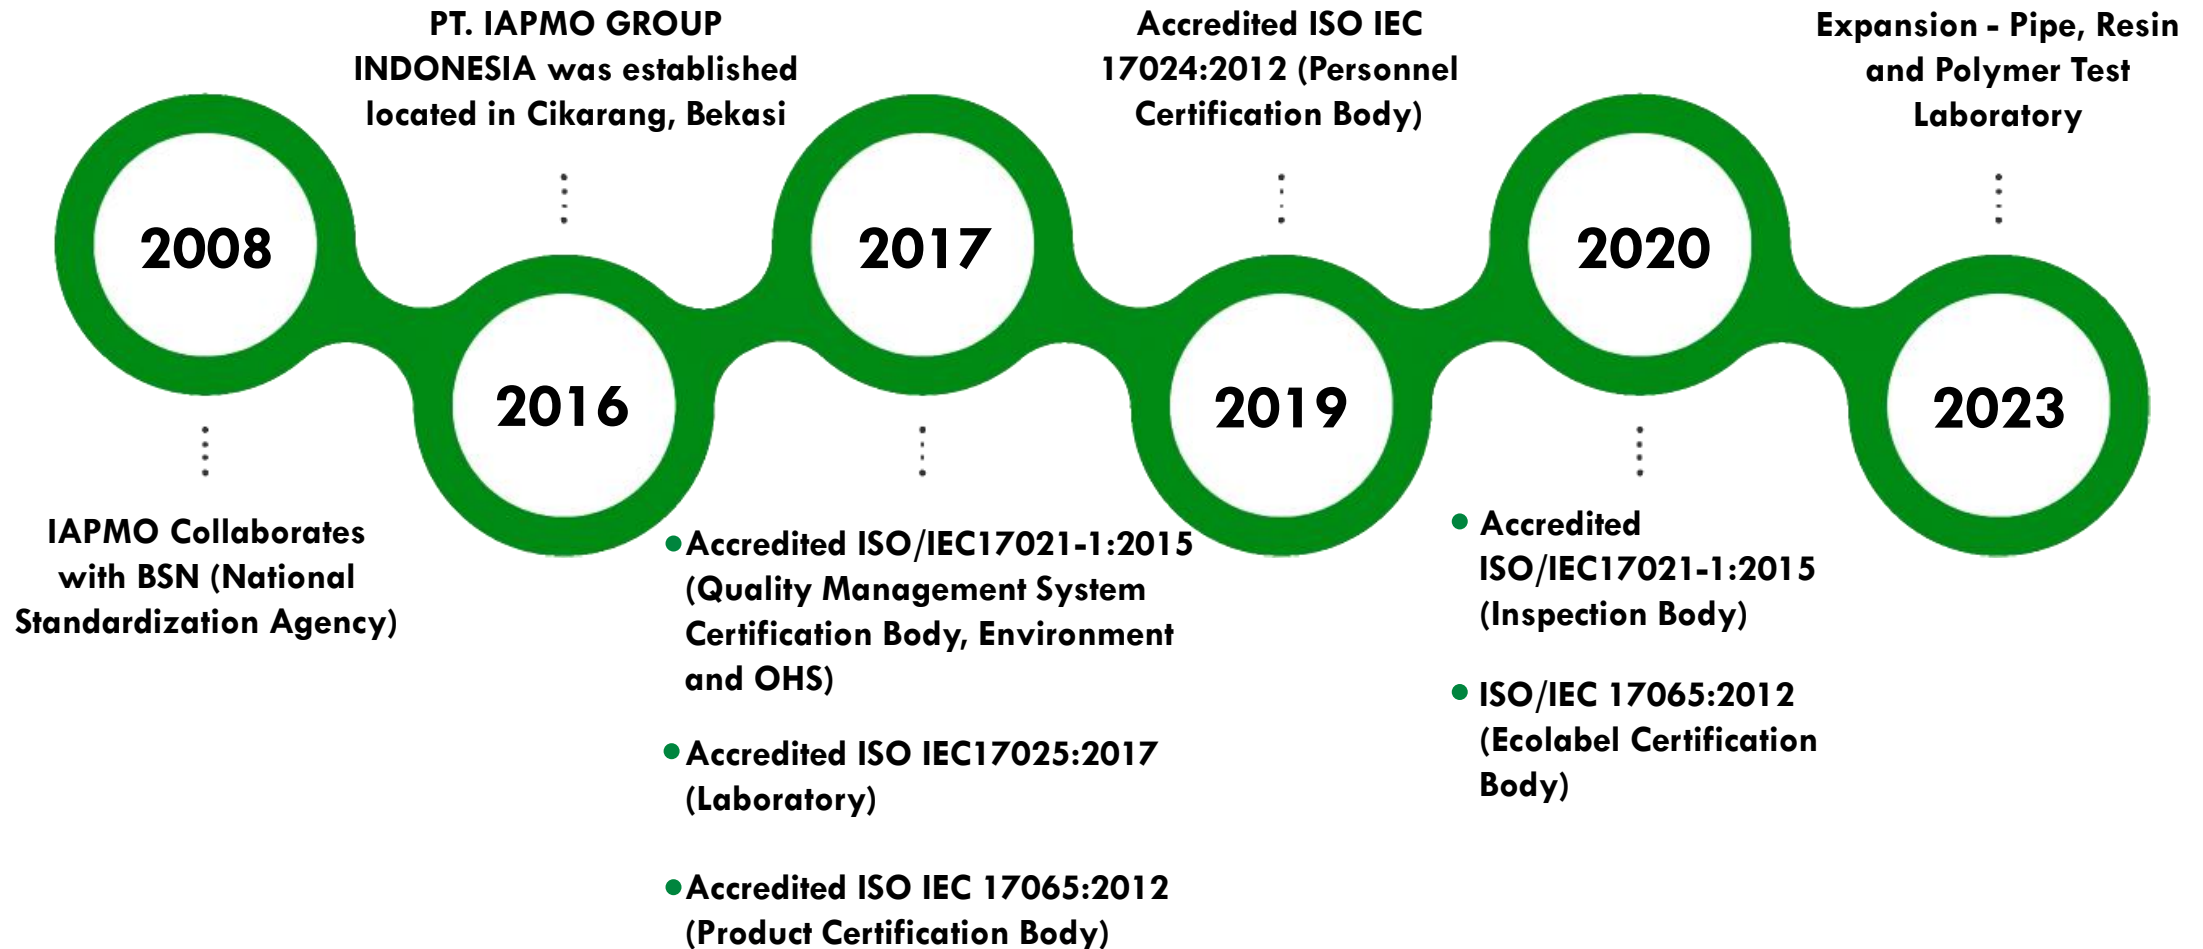

Public Health and Safety with
Environmental Awareness

ASSURANCE. CONFIDENCE. PROGRESSIVE

IAPMO Group Indonesia Journey

Working Relationships IAPMO Group Indonesia

- **BSN** (Badan Standardisasi Nasional) Standard development related to plumbing.

- **GPCI** (Green Product Council Indonesia) Appointment as the verification agency for Green Label Indonesia.

- MoU with the Center for Research and Development of Housing and Settlements **Kementerian PUPR** – Plumbing System Inspection for Sertifikasi Laik Fungsi (SLF) for buildings.

- MoU with **PERPAMSI** (Persatuan Perusahaan Air Minum Seluruh Indonesia) aimed at ensuring product quality assurance and enhancing the competency of plumbing members.

- PT IAPMO Group Indonesia was appointed by the Ministry of Industry as a Conformity Assessment for the implementation of several Mandatory SNI products.

- Collaboration with the Ministry of Environment and Forestry regarding the implementation of Type 1 (whole product criteria) based on ISO 14024 and SNI ecolabel and Type 2 Based on ISO 14021 (Self declaration based on environmental claims)

- The PI IAPMO Group Indonesia has agreed to collaborate on the assessment of the Green Toll Road Indonesia (GTRI). GTRI is a Green Assessment standard for toll road sections, which includes six indicators such as access, feasibility and service, energy and water efficiency, environment, materials, construction, and regional cooperation. These indicators aim to align with the Sustainable Development Goals (SDGs)
